

TEROMBU
SEAFOOD TERRACE

the 1990s, the number of people in the world who are illiterate has increased from 1.1 billion to 1.5 billion.

There are many reasons for this. One is that the population of the world is growing so fast that the number of people who are illiterate is increasing even though the percentage of illiterate people is decreasing.

Another reason is that the quality of education is poor in many countries. This means that many people who go to school do not learn enough to be able to read and write.

There are also many people who do not go to school at all. This is because they are too poor to afford to go, or because they have to work to help support their families.

It is important to find ways to help these people learn to read and write. This will help them to improve their lives and to participate more fully in society.

There are many organizations that are working to help people learn to read and write. These organizations are doing a great job, but we need more people to help them.

One way to help is to donate money to these organizations. Another way is to volunteer your time to help teach people to read and write.

It is our responsibility to help these people. We can make a difference in their lives if we only try.

Let's work together to help these people learn to read and write. We can make a difference in their lives.

Let's work together to help these people learn to read and write. We can make a difference in their lives.

Let's work together to help these people learn to read and write. We can make a difference in their lives.
